Acquisition Information

The Maps of Private Land Grant Cases of California were placed on permanent deposit in The Bancroft Library by the U.S. District Court, San Francisco.

Accruals

Additional material is not expected.

Processing History

The Land Case Maps were cataloged by the University of California during the California Maps Project from 1990 through 1993. The project was funded by the Department of Education and the University of California, Berkeley. The bulk of the cataloging was done by Randal Brandt.

The entire Land Case Maps collection was processed for digitization by Jeffrey Hookom. The digitization was carried out by the Digital Imaging Lab at UC Berkeley. The Land Case Maps Digital Archive project was managed by Mary W. Elings.

Administrative History

The maps, or diseños, that comprise the Land Case Maps collection originally formed part of the private land claims adjudicated by the U.S. District Courts of California (Northern and Southern Districts) and the U.S Circuit Court (9th Circuit) from ca. 1850 to 1860. The records of the private land claim cases, along with the maps, were held by the U.S. District Court, San Francisco until 1951 when they were transferred to The Bancroft Library.

Scope and Content of Collection

The Land Case maps collection comprises maps found in private land claim cases in the U.S. Northern and Southern District Courts. The maps were created to establish ownership of the land represented. The maps show property boundaries, any buildings, and natural features. The maps cover a period from approximately 1850 to approximately 1890.

4362 S22664

The inscription on this diseño was referred to the National Archives by a Mr. Benson, of Loveland, Colorado (see his letter in Bancroft Library Files, dated April 28, 1967). Miss Jane F. Smith, Director, Social and Economics Records Division of the National Archives stated: ' . . . while the handwriting of the note is sharp, its legibility is very poor. However, we do detect two errors in Dr. Tomkins [sic] version of the note cited in your letter. The name at the botom of the note should read "Arguello," not "Aruello," and the second word from the end is "resulta", not ["]vuelta["]'. We are unable to verify the words "largado" and "volver" in Dr. Tomkins' version. We agree with Dr. Tomkins as to the remainder of the note. . . . The Nota might then be translated,- "This land is part of a private holding and the southerly extension is that which should be resolved." Arguello.' JBT 5.3.67

Information taken from label attached to map.

Notes on Land Case Map D-194: This is most likely a map of the Sonoma Valley as noted on the title card. The small arrow at the bottom right hand corner points north. The main river which runs through the center of the map is most likely the Sonoma Creek with its tributaries while the other less prominent one is probably the [sic.] Carriger Creek.
